
PERMIT & CERTIFICATE INFORMATION

Certificate of Compliance

A Certificate of Compliance is required when expanding the footprint, or adding new construction, to an existing property. Within Williamson County there is no specific "building permit", a Certificate of Compliance is sufficient.

Driveway Permit

A driveway permit is required for lots on all county maintained roads. If property is on a state maintained road please contact Texas Department of Transportation.

On-Site Sewage Facility Permit

If an On-Site Sewage Facility (septic system) is necessary a permit will need to be purchased. The end result is a License to Operate an OSSF in Williamson County. Residential and Commercial OSSF's in Williamson County are required to have a licensed system.

OTHER REQUIREMENTS

Contact the local Emergency Services District within the property's area to see if any further requirements or permits are needed. This is especially recommended for Commercial proposals.
