

Corridor F / U.S. 183

Greetings,

Last summer, the Corridor F / US 183 Study project team conducted a safety study to identify short-term to medium-term safety enhancements in the corridor. Several safety projects were suggested and pushed forward by TxDOT with more than \$12 million in funding.

We are happy to announce that the Highway Safety Improvement Program awarded construction funding for the installation of a continuous turn lane and paved shoulder on US 183 from CR 254, north of Live Oak Trail, to CR 212, south of Cole Drive.

The turn lane and shoulder improvements are a welcome safety improvement for US 183.

Thank you for your continued participation and feedback.

Sincerely,

The Corridor F Project Team
