

## STREET WORK NOTICE

Preventive maintenance is essential  
in keeping our roads in good  
condition before major damage occurs.

Williamson County crews will be applying a protective  
coat to your street within the next few weeks.

This coat will consist of a specially modified asphalt that  
is lightly sprayed over the existing pavement and is called  
a fog seal.

Several days before we begin work on your street,  
we will hang another notice on your door with  
information on how you can help us do a quality job.

To get in touch with us or to hear a recording of the next  
streets to be coated,

**Call Resurfacing Hotline: 512-943-3393**

or visit our website: [www.wilco.org/roads](http://www.wilco.org/roads)
